

Region III T/TA Network

Screenings, Referrals, and Individualization, Oh My! Grow your heart, brain, and be courageous in supporting ALL children!

Hosted by the PA Head Start Association

Description

Young children vary in their skills, knowledge, backgrounds, and abilities. Identifying young children with unique developmental needs, ensuring they receive appropriate and timely services, and helping families navigate eligibility guidelines are key ways the Head Start program provides inclusive services for children with disabilities and their families. Join the National Center on Early Childhood Development, Teaching and Learning as they present a 3-part virtual series, that focuses on how to best serve children with any suspected delays or diagnosed disabilities. Participants will have an opportunity to explore strategies for addressing the needs of ALL children including those from diverse populations and those who are also dual language learners.
